

## Job Profile Software Developers

### The company - FullFact Solutions

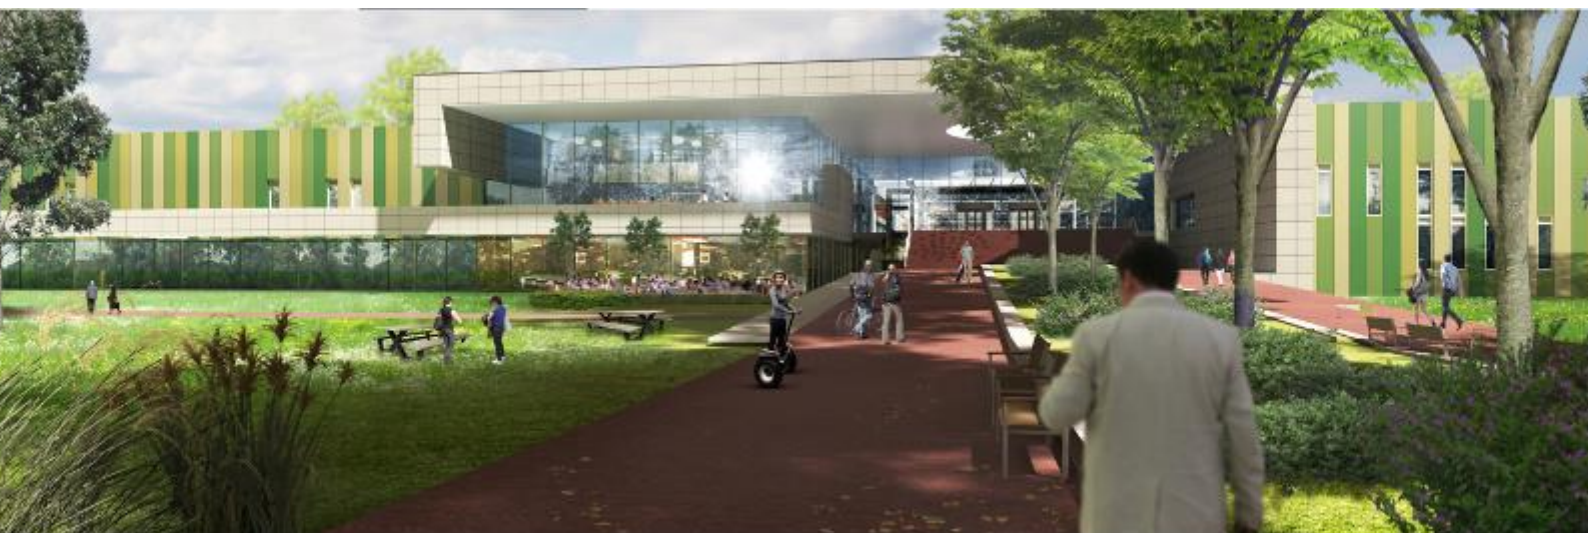

"We are pioneers and OEE Toolkit experts. We connect people and technology to improve productivity."

First and foremost, we are a software company and our software suite -OEE Toolkit- exists since 1995. FullFact Solutions has always been passionate about supporting manufacturing teams and production management through our software and services to identify, visualize and eliminate hidden losses in existing production facilities.

We foresee strong growth from our large international installed base as well as new customers & relations. A new product architecture and newly developed innovative software modules and complementary services will be at the core of this growth. Because of this, FullFact will be expanding existing development capacity and is hiring Software Developers (recruiters: acquisition due to this vacancy is not appreciated).

Besides the opportunity to join a professional yet fun and informal organization and work on cool new products, you will team up in realizing the company's growth.

FullFact currently employs 15 employees and we operate from our Head Office in the Netherlands. To accommodate our growth and show our commitment, in September 2019, we will take office in **the** hotspot in Eindhoven: Brainport Industries Campus (BIC), a brand new and state-of-the-art campus for open innovation and collaboration (<https://www.brainportindustriescampus.com/en/about-bic/what-is-brainport-industries-campus>).

## Experienced WPF .NET Software Developers Front end Developers for Web Applications Back end Developers for Web Services

As part of an agile team, you will be responsible for the development of the next generation of our OEE Toolkit architecture. We expect you to bring vision and knowledge in software development. You are a team player and you are not afraid to challenge us and be challenged yourself. Together we will build an environment to get the best out of the team so that we can keep maintaining and expanding a high end product. The job is preferably full-time. English is our corporate language.

Our current applications are built on the Windows Desktop Platform using WPF and we are shifting to Web Applications.
